

Horizon 2020 partnership search

Dear sir or madame,

We are from the Energy Agency of La Ribera, a local energy agency involving 47 municipalities and around 300.000 inhabitants. We have a wide experience in European projects, specifically in IEE and MED programs. Our activities are focused basically on the promotion of energy efficiency, renewable energies, sustainable mobility and environment applied mainly to municipal management, industry, education and public awareness.

We would like that you take us in account for a possible partnership if you have a proposal for the next **Horizon 2020 Programme** or you take part in a consortium in which you look for a partner with our profile. We are interested on the following areas:

- Secure, Clean and Efficient Energy.
- Environment and Climate Action.
- Smart, Green and Integrated Transport.

You can visit our website to know more about our activities:

<http://www.aer-ribera.com/eng/home.html>.

We are looking forward to collaborate with you in this programme.

Best regards.

M^a Pilar Pérez Casañ
