## Partner search: a secondary school from Poznan (PL) is looking for partners for a Erasmus+ project

**Comprehensive School no. 29 in Poznań (Poland) is looking for possibilities to join an international cooperation and exchange project in the framework of Erasmus+ programme.**

The school consists of 3 different units: the comprehensive secondary school, the technical school educating in various technical subjects and the vocational school. It exists for more than 25 years offering a high level of comprehensive and professional teaching for young professionals and preparing students to continue their education at universities.

Our Technical School has participated in a special programme of professional exchange for students and teachers with Germany. Our students visit various companies and factories there and collect new experiences and skills, that can be useful in their future career.

At the moment, we are looking for possibilities to join an international cooperation and exchange for the students of the comprehensive school. The school offers a wide variety of teaching profiles that allow the school be able to fulfill many different educational needs of our times. It is divided into 3 different profiles - we have classes preparing for future work in the police forces, sport and defence classes and finally- psychological-pedagogical classes.

We are open for ideas and we are also ready to suggest our ideas and subjects to discuss together.

The school already has the PIC number for registering and identifying in projects. Its Erasmus+ coordinator - Mrs Agata Wójcik

was previously a school coordinator of the Comenius project and lead another school in the Erasmus+ project with the title: "HOME, SCHOOL, STUDENT - THE EDUCATIONAL TRIANGLE". She is also a member of a Town Council, which gives a unique opportunity to work for the community and influence changes in the town.

We are ready to cooperate and be a reliable and responsible partner for any organisation and school in Europe. Do not hesitate to contact us about further information and description of our school and its achievements.

We're looking forward to hearing from our future partners.

Contact:

AGATA WÓJCIK

Erasmus+ school coordinator, English teacher
